

WX1GYX SKYWARN NET CONTROL SUMMER SCRIPT

Calling all amateurs, SKYWARN has been Activated for our area.

Calling all amateurs, SKYWARN has been Activated for our area.

This is _____ (call sign) Net Control for SKYWARN, in contact with the National Weather Service in Gray, ME. All SKYWARN spotters and Amateur operators are requested to stand by for further information at this time.

(IF in WATCH mode READ EVERY 30 MINUTES)

“The National Weather Service has indicated that there is a THREAT for SEVERE WEATHER within the listening area of this repeater. (Read the list of watches if possible) SKYWARN is in Standby mode, and amateurs may continue to use the repeater. Please keep transmissions short with breaks to permit severe weather reports to reach SKYWARN.”

(IF in WARNING mode READ EVERY 15 MINUTES, BREAKING INTERMITTENTLY FOR WARNINGS AND REPORTS)

“The National Weather Service has indicated that SEVERE WEATHER IS OCCURRING within the listening area of this repeater. (Read the list of warnings if possible) SKYWARN is currently activated as a directed net.”

“All amateurs are encouraged to call SKYWARN with reports of severe weather. When calling SKYWARN Net Control please give your Spotter ID if you have one, and indicate the exact location where severe weather is occurring. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK.”

“The National Weather Service is looking for reports of the following:

1. Tornadoes, funnel clouds, or rotating wall clouds
2. Hail (please give the size as compared to US coins)
3. Wind gusts in excess of 30 miles per hour or greater.
4. Flooding of streams, creeks, or rivers or coastal areas out of their banks
5. Roads (location needed), or streets made impassable due to water or debris.
6. An inch or more of rain accumulation - (measured in rain gauge if possible).
7. Any damage to structures/ property by wind or lightning
8. Downed trees, large branches (give est. size), or power lines.”

“Please do not call SKYWARN if there are none of these severe weather events is occurring in your area. Any station experiencing one of these severe weather events call SKYWARN Net Control at this time.”

(Read this portion once during the hourly NCS announcement, or as directed by the Net Manager)

In the event of a repeater outage on this frequency, our primary backup repeaters are either 147.045- PL 103.5 (K1MV GRAY, ME) or 146.655-PL 100 (MT.WASHINGTON, NH). Stations are requested to QSY to the most readable primary net frequency or to the best available subnet frequency.”

“This is _____ (call sign), over.”

WX1GYX SKYWARN NET CONTROL WINTER SCRIPT

Calling all amateurs, SKYWARN has been Activated for our area.

Calling all amateurs, SKYWARN has been Activated for our area.

This is _____ (call sign), Net Control for SKYWARN, in contact with the National Weather Service in Gray, ME. All SKYWARN spotters and Amateur operators are requested to stand by for further information at this time.

(In WATCH mode: READ EVERY 30 MINUTES)

“The National Weather Service has indicated that there is a THREAT for SEVERE WINTER WEATHER within the listening area of this repeater. (Read the list of watches if possible) SKYWARN is in Standby mode, and amateurs may continue to use the repeater. Please keep transmissions short with breaks to permit severe weather reports to reach SKYWARN.”

(In WARNING mode: READ EVERY 15 MINUTES, BREAKING INTERMITTENTLY FOR WARNINGS AND REPORTS)

“The National Weather Service has indicated that SEVERE WINTER WEATHER IS OCCURRING within the listening area of this repeater. (Read the list of warnings if possible) SKYWARN is currently activated as a directed net.”

“All amateurs are encouraged to call SKYWARN with reports of severe weather. When calling SKYWARN Net Control please give your Spotter ID, if you have one, and indicate the exact location where severe weather is occurring. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK.”

“The National Weather Service is looking for reports of the following:

1. Snow accumulation in inches
2. Any ice accumulation on trees, streets, or power lines
3. Sleet or freezing rain
4. Wind gusts in excess of 30 miles per hour or greater
5. Roads (location needed), or streets made impassable due to snow or debris.
6. Downed trees, large branches, or power lines,
7. Downed trees, large branches (give est. size), or power lines.”

WX1GYX SKYWARN STANDBY Mode Net Script

STANDBY Mode = Read informally every 30 to 60 minutes. NOTE: (STANDBY Mode is **VERY** informal, and is used primarily for LISTENING for reports. Reading the script is only customary at best and is not time-critical)

SKYWARN is now ACTIVE in **STANDBY Mode only**. “This is (call sign), in contact with the National Weather Service in Gray, ME. Standby Mode is an informal net that is used during severe weather situations that do not warrant a directed SKYWARN Severe Weather Net. But we are monitoring the frequency for severe weather reports.”

“The National Weather Service has indicated that there is a THREAT for SEVERE WEATHER within the listening area of this repeater. (Read the list of watches if possible) SKYWARN is in **STANDBY Mode only**, and amateurs may continue to use the repeater. It is very helpful if transmissions are kept short and the repeater squelch tail is allowed to drop all the way out between transmissions.”

“When calling SKYWARN, please give your Spotter ID if you have one, and indicate the exact location of the event you are reporting. This includes city AND state, nearest town, road, or intersection. Please do not use landmarks. Major roadways are OK.”

(Read the appropriate table below. NOT both!)
